### **Shifting Seasons, Cultures and Climates**

**GAS Shift** - Ann and Gord Baird - Eco-Sense is getting closer. After the winter, and the first building complete, Eco-Sense is gearing up for the construction of the house, a truly green sustainable home. Grey water and rain water infrastructure complete, solar hot water system design being finalized, solar and wind systems designed and infrastructure in place, it is time for the house. As the season changes from winter to spring, so does the need for cultures as Ann and Gord point out in this months update. Cob workshops for the spring and summer are posted on their website.

### **Shifting Seasons, Cultures, and Climates**

Every month our update could easily begin with the words,
