Stop standing around like deer in the headlights...Stop this process from happening.

1. Start World Trade War
2. Invite foreign companies to move to US to avoid Tariffs
3. Create poor working class using immigrant children from Walmart detainees
4. Add the new factories to the detained centres so that detainees can live in Walmart barracks and work in factories next door.
5. Nationalize these new industries and get buddies to run them thus creating a rich American oligarchy just like Russia

Bonus...Donald Chump gets his **wall** created by building **Wal**marts along the border using cheap child labour. That's how he can get Mexico to pay for his wall
