---

Just occurred to me that the shutdown of the US government is also shutting down the IRS which means the House can't get Trump's tax returns. Now suddenly the absurd wall makes sense.

The shutdown is also helping Russia destroy the economic power of the US....And now we find that Trump is being investigated by the FBI for possible treason by aiding the Russians to undermine the US.

Perhaps the Dems should offer Trump 5 billion for his tax returns.....That should shut him up.
