Editorial note: This remnant of a manuscript, discovered in a vault near the coastal town of Walpole, Massachusetts, appears to have been part of a larger project, probably envisioned as an interpretive history of the United States since the year 2000. Only a single chapter, probably written near the midpoint of the twenty-first century, has survived. Whether the remainder of the manuscript has been lost or the author abandoned it before its completion is unknown.] **Chapter 1 The Launch**

From our present vantage point, it seems clear that, by 2019, the United States had passed a point of no return. In retrospect, this was the moment when indications of things gone fundamentally awry should have become unmistakable. Although at the time much remained hidden in shadows, the historic pivot now commonly referred to as the Great Reckoning had commenced.
