Swine flu-- The Chickens Have Come Home to Roost

PEJ News - cowboss - "Inconvenient Truth" the Pork Producers and Mainstream Media does not want you to know.

www.PEJ.org What you have been told is the Swine Flu is a mix of Swine, Chicken and Human Virus. What you have not been told is that for years now "Chicken slaughter house waste" and "Pig slaughter house waste" has been fed to pigs. What else you have not been told is that pigs with PRRS (Porcine Reproductive & Respiratory Syndrome) disease have been routinely ground up on the farm and fed back to the pig herd to "Build Immunity" to

PRRS. It must be noted that like swine flu PRRS is a Virus. --- A QUOTE from:

BEST MANAGEMENT PRACTICES USED IN THE CONTROL OF PRRS.

"Homologous immunity may be provided to the breeding herd through exposure during an outbreak or under more controlled circumstances such as intentional feedback of tissue that contains PRRS virus"

Read the above carefully, A practice (intentional feedback of tissue that contains PRRS virus) that is not only revolting, BUT is also begging for TROUBLE. It must also be noted that pigs with PRRS are also routinely sent to slaughter as a culling mechanism, a fact the Media does not and will not tell you.

As I stated in the title "The chickens have Truly come Home to Roost" --- Time for you to tell your MP "ENOUGH IS ENOUGH and IT IS TIME FOR CHANGE"
